

PROTEASE (Subtilisin A) from *Bacillus licheniformis* (Lot 201001a)

E-BSPRPD
(EC 3.4.21.14)

07/21

PROPERTIES

1. PURITY:

- Single major band on SDS-PAGE (MW = 30,250); minor bands at MW < 30,000
- Single major band on isoelectric focusing (pI 8.8); minor band at pI 9.3

2. SPECIFIC ACTIVITY AND LEVEL OF OTHER ACTIVITIES:

- Activity: approx. 9 tyrosine-equivalent Units/mg solid
- Specific activity: approx. 9 tyrosine-equivalent Units/mg solid
- Essentially devoid of β -glucanase

One Unit will hydrolyse casein to produce colour equivalent to 1.0 μ mole (181 μ g) of tyrosine per minute at pH 7.0 at 40°C (colour by Folin-Ciocalteu reagent).

3. PHYSICOCHEMICAL PROPERTIES:

pH Optima:	7.0-7.5 (60% of maximal activity at pH 6.0)
pH Stability:	5.5-10.0
Temperature Optima:	60°C
Temperature Stability:	< 60°C

4. STORAGE CONDITIONS:

The enzyme is supplied in powder form. Stable for > 4 years below -10°C.
This enzyme is suitable for use in AOAC INTERNATIONAL Total Dietary Fibre analytical procedures.

Once dissolved, store frozen between use.
